

HARKIRAT SINGH

Delhi, NCR, India | +91 7042063915 | harkiratsingh708k@gmail.com

PROFESSIONAL SUMMARY

Business & Operations Analyst with international academic training from Durham College, Canada, combining hands-on experience in SQL reporting, Excel dashboarding, and operational process improvement with a strong technical foundation in Linux systems, PowerShell automation, and cloud fundamentals (AWS/Azure). Proven ability to translate raw operational data into actionable dashboards and insights that support faster, data-driven decision-making. Seeking a Data Analyst, Business Analyst, or IT/Systems Analyst role where analytical rigor and technical versatility can drive measurable operational efficiency.

CORE SKILLS

Data & Analytics: Excel (Pivot Tables, VLOOKUP), SQL / MySQL, Power BI, Data Visualization, Dashboard Reporting, Trend Analysis

Systems & Automation: Linux, PowerShell, Bash, Windows Server, Virtualization, Task Automation

Infrastructure & Networking: TCP/IP, DHCP, DNS, Network Configuration, System Troubleshooting

Cloud & Tools: AWS Fundamentals, Azure Basics, JIRA, Git

Business Skills: Requirements Gathering, Stakeholder Management, Process Improvement, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Business Analyst

Jenika Ventures — Gurgaon, India | 2026 – Present

- Built and maintained Excel dashboards tracking 20+ operational KPIs and sales metrics, giving leadership real-time visibility into performance trends.
- Developed Excel-based reports to monitor lead conversions and KPI targets, supporting faster and more informed decision-making across teams.
- Collaborated with cross-functional teams to identify workflow inefficiencies and improve reporting processes, streamlining how operational data was captured and shared.

Technical Support & Systems Analyst Intern

Tech Solutions Inc. — Toronto, Canada | 2025

- Delivered technical support across hardware, software, and network issues, ensuring timely resolution for end users.
- Managed and tracked support tickets in JIRA, maintaining consistent SLA adherence and timely issue resolution.
- Configured and maintained Windows and Linux systems, assisting with network setup and system troubleshooting.
- Documented troubleshooting procedures and system configurations, creating reference material that improved team response time on recurring issues.

Data & SQL Analyst — Project Experience

Durham College — Oshawa, Canada

- Designed and queried relational databases using SQL to analyze operational datasets and surface business insights.
- Built complex SQL queries using JOIN, GROUP BY, and aggregation functions to generate reporting-ready insights from raw data.
- Developed Excel dashboards that integrated SQL query outputs for performance reporting and trend analysis.
- Optimized database queries to improve data retrieval efficiency and reduce reporting turnaround time.

Cloud & Infrastructure Automation — Technical Project

Durham College — Oshawa, Canada

- Configured Linux and Windows servers along with core networking protocols (TCP/IP, DHCP) in a lab environment.
- Automated recurring system administration tasks using PowerShell and Bash scripting.
- Worked with AWS and Azure fundamentals to deploy and monitor system performance in a cloud environment.

EDUCATION

Post-Graduate Diploma, Information Technology

Durham College — Oshawa, Canada | 2023 – 2025
